PROJECTS

Alt-Blog App [Live-link](#) [Repository](#)

Full Stack Project | Sept 2021

- **Challenge:** To build a web application where fellow learners could post and read blog posts on their day to day progress.
- **Solution :**
 1. Built Architectural design for the User-Interface and the API of the blog Application.
 2. Used React, NodeJS , Express, MongoDB and TailwindCSS to build the working web application.

My Portfolio [Live-link](#) [Repository](#)

React Project | Oct 2021

- **Challenge:** To create a web application where people could know more about me, my tech skills, my blog posts and more of my projects .
- **Solution:**
 1. Built a single page React Application to list a few of my Projects, my blog articles, about me and my contact Information .
 2. Used Tailwind CSS to make it responsive for different screen sizes.
